CAMPBELL'S EARLY IS A BEAUTIFUL BERRY

J. T. GARRISON & SONS

Nurseries at Bridgeton, N. J.

WOODSTOWN,

NEW JERSEY

INSTRUCTIONS

TERMS, cash with order; but orders will be booked if one-fourth value is enclosed, the remainder to be sent before shipment. C. O. D. orders require one-fourth value with the order. Send remittance at our risk by post-office order, express money order, bank draft or registered letter. Stamps taken as parts of a dollar.

ORDERS should be sent in just as soon as possible after receiving this catalogue, as we may run short and early set plants do better.

TIME OF SHIPMENT. From the time you receive this catalogue to May 15. By far the larger part of our shipments are made during March and April.

TRUE TO NAME. While we use every precaution to have all plants true to name (and we believe we come as near doing this as anyone in the business) we will not be responsible for any sum greater than the cost of the stock, should any prove otherwise than as represented.

Our responsibility ceases with good delivery receipt from the carrier. Claims for loss or damage must be made by the purchaser. We are not printing in our catalogue this year the certificate of nursery inspecting. Same will appear however, on all shipping tags used in filling our orders.

IN EXPLANATION.

On account of the increased cost of paper, printing, etc., caused by the abnormal conditions which exist, due to the war, we have decided to issue a small pamphlet and price list for Spring 1919. Our many friends and customers who have in the past received our 28-page catalogue, beautifully engraved, together with numerous photographs of

the leading varieties, testimonials, etc., we firmly believe will accept this little folder and realize that the sacrifice is only made for the duration of the war or until such time as conditions adjust themselves to normal. You can rest assured, however, that we will furnish our customers with the same high quality plants, as well packed and all orders taken care of with the same high efficiency as we have practiced in other years.

You will please note that we are not leading any new varieties, from the fact that we have failed to find in the past three years any better profit producers than the "Campbell's Early," "Lupton" (late) and the only wonderful fall everbearer, the "Progressive."

While our prices may seem high, please remember that strawberries sold last season for higher prices than ever before, and in 1919 they will make history for the highest prices that have ever been realized since strawberries were first propagated from their wild state.

As a matter of fact a certain speculator has already offered us at the rate of \$500 per acre for our entire nursery's plantings.

This year of all years either in the past or in the future is the advantageous time to plant strawberry beds and the next few years will show some wonderful profits to those that take advantage of the opportunity to plant against the greatly reduced acreage throughout the country and especially the south caused by the labor situation. May we not expect your order for requirements. Order early for no nursery will have plants to offer after the first few weeks from the beginning of 1919.

Thanking you for past orders, we beg to remain, Faithfully,

J. T. GARRISON & SON.

LIBERTY BELL

Entirely New

Liberty Bell is a new one originated in Cumberland Co., New Jersey, and is a seedling of the Gandy. Wonderful, thrifty plant producer, heavy yielder and in general appearance favors Gandy. However, it is twice as large. The writer had no trouble in picking a quart, of which 18 berries

filled it to overflowing. Liberty Bell is as firm a berry as Gandy, and you can make no mistake in giving it a trial. The above description is not varnished. Only a limited number of plants to offer, so order quick if you want to be sure of getting any. 12 plants, \$1.20; 25 plants, \$2.00; 50 plants, \$3.00; 100 plants, \$5.00, parcel post, prepaid.

CAMPBELL'S EARLY

The Greatest of All Early Strawberries

Its earliness, size, color, flavor, firmness, yield and bed making qualities will establish a reputation for Campbells—better than any early variety we have ever seen. Not a single good point lacking to put it in a class strictly by itself as the leading money maker.

Every berry a topper, every one a shipper, and every one a seller. The last picking of Campbells will produce you larger, better berries than the first picking of any other early variety.

Think of it, as early as Michael's Early, Excelsior, Fairfield or Klondike, on a clean market at the highest price for the season.

"Campbell's" hasn't a single weak point, and their hardness will insure them against either change of soil or climate.

The old saying, "the early bird gets the worm," is as true today as it ever was. Plant Campbell's Early the coming season and you will get two worms.

CAMPBELL'S EARLY WINS AGAIN

SOLD IN NEW YORK AND BOSTON MARKETS IN 1917 at from 11c to 18c qt. straight Cedarville Farm's Co. report net returns received from 4 acres pick-

ed in 1917 more than \$2,500 clear of all picking and expenses. Pronounced by leading authority as being the best first early on the market today.

Ed. Stearn, Williamstown, N. J., cleared \$2000 from two acres of Campbell's Early in 1918, selling at 20c to 25c a qt. in market

PROGRESSIVE

The Great Yielding Everbearing Variety
The Only Wonderful

Our leading Fall bearing variety. We can say without hesitation that the Progressive is by far the best everbearer to fruit for profit. Others are

worthless for other than garden or table use; or for exhibition purposes. Any honest Nurseryman will tell you the same thing if you will ask him.

OUR LATE LUPTON TAKES THE LEAD

Strawberries You Will Love to Pick

Easily wins out for highest prices in local and distant markets. Pronounced by farmers and commission merchants as being the firmest and best late variety. Said to be firmer than the Gandy, and we will positively guarantee it to be firmer and carry better than any other variety or refund your money for plants. The originator of this variety demonstrated the firmness of Lupton before a large agricultural meeting held at the Seabrook Farms Co., in 1916, by juggling them several feet in the air,

and allowing them to come down on hard board surface.

It is easy to fill up the quarts with Lupton, and they are still full when reaching far distant markets.

Every grower is crazy about them. (Just keep your eye on Lupton strawberries in the big markets in the near future—see them given special mention.) While we have testimonials from reliable shippers, farmers and merchants, space does not allow us to use them. They will be forwarded, however, to anyone sending stamp.

CHESAPEAKE

The Late Money Maker

The berries are extra large and fine flavored, deep brilliant red in color, ripen all over, and glossy in appearance. In fact, the very last picking may be considered fancy, being the sort that will sell readily in a glutted market. The plants are great big fellows with great thick roots, fine upright foliage, very large leaves, almost round, and dark green in color. While they are as healthy a variety as we have on our farms, it is not their nature to bed very thick, so we advise setting plants one-third closer than extra good bed making varieties. We sold an order last season to one customer of 200,000 who had been fruiting Chesapeake 7 or 8 years, and knew he was taking no chances, as experience is the best teacher, and our sales increase each year on Chesapeake and we set more of them each year, but have always sold out before the season was over. Be sure and order some Chesapeake.

NOTE—The Chesapeake will cover the surface of the ground and appear to have as many plants as other varieties, however, their extremely large size fools one and they will only produce approximately half the plants per acre as against other varieties. This will explain why our price is higher on them than other leading kinds.

**THE CHESAPEAKE IS A STANDARD LATE
